Increasing food security. As part of the Feed the Future initiative, USAID brings partners together to address the root causes of hunger and poverty. We work to enhance food security and increase incomes through improving the competitiveness and diversity of agricultural market systems and livelihoods.

Food Security | IFPRI : International Food Policy Research

Agricultural economics is an applied field of economics concerned with the application of economic theory in optimizing the production and distribution of food and fiber products. Agricultural economics began as a branch of economics that specifically dealt with land usage, it focused on maximizing the crop yield while maintaining a good soil ecosystem.

Caribbean Agricultural Research & Development Institute

The Food for Progress Program helps developing countries and emerging democracies modernize and strengthen their agricultural sectors. U.S. agricultural commodities donated to recipient countries are sold on the local market and the proceeds are used to support agricultural, economic, or infrastructure development programs.
