Research Methods in Second Language Acquisition: A Practical Guide is an informative guide to research design and methodology for graduate students and scholars. Each chapter of this volume offers background, step-by-step guidance, and relevant studies to create comprehensive coverage of each method. Includes chapters by expert scholars on an array of topics, including second language writing and reading, meta-analyses, research replication, qualitative data collection and analysis, and more. Includes feature boxes in each chapter highlighting relevant research studies, discussion questions and suggested further readings. Utilizes research methods and tools from varied fields of study, including education, linguistics, psychology, and sociology.

Studies on Learning and Teaching Chinese
Read Online The Study Of Second Language Acquisition

This volume offers an introduction to the field of second language acquisition with a particular focus on second language Spanish. It connects key issues in the acquisition of Spanish as a second language to theoretical and empirical issues in the field of second language acquisition more generally by exemplifying central concepts in second language acquisition through the exploration of the most widely researched structures and most recent developments in the field of second language Spanish. It is written for a non-specialist audience, making it suitable for advanced undergraduate and graduate courses and readers, while its treatment of recent empirical developments also makes it of interest to researchers in second language Spanish as well as allied fields.

Referring in a Second Language

For teachers of English, connecting with non-native students can pose significant problems, but communication technologies may offer a viable solution. Cases on Communication Technology for Second Language Acquisition and Cultural Learning provides educators with valuable insight into methods and opportunities for using technology to teach students learning a foreign language. Theoretical and pragmatic cases illustrate teaching strategies and methodologies, hardware and software development, administrative concerns, and cross-cultural considerations with respect to effective educational technologies. Educators and students, as well as administrators
Read Online The Study Of Second Language Acquisition

and developers, will use this book to improve the effectiveness of second language curricula across a variety of intercultural perspectives.

**Principles and Practice in Second Language Acquisition**

The Handbook of Second Language Acquisition presents an integrated discussion of key, and sometimes controversial, issues in second language acquisition research. Discusses the biological and cognitive underpinnings of SLA, mechanisms, processes, and constraints on SLA, the level of ultimate attainment, research methods, and the status of SLA as a cognitive science. Includes contributions from twenty-seven of the world's leading scholars. Provides an invaluable resource for all students and scholars of human cognition, including those in linguistics, psychology, applied linguistics, ESL, foreign languages, and cognitive science.

**Second Language Acquisition**

This book is a thorough revision of the highly successful text first published in 1994. The authors retain the multidisciplinary approach that presents research from linguistics, sociology, psychology, and education, in a format designed for use in an introductory course for undergraduate or graduate students. The research is updated throughout and there are new sections and chapters in this second edition as well. New chapters cover child language acquisition (first and second), Universal Grammar, and instructed language learning; new sections address issues,
such as what data analysis doesn't show, replication of research findings, interlanguage transfer (multilingual acquisition and transfer), the aspect hypothesis, general nativism, connectionist approaches, and implicit/explicit knowledge. Major updates include nonlanguage influences and the lexicon. The workbook, Second Language Learning Data Analysis, Second Edition, makes an ideal accompaniment to the text.

The New Handbook of Second Language Acquisition

This book unites a range of emerging topics in the burgeoning transdisciplinary fields of second language acquisition and interculturality in a study abroad context. It explores key issues, trends and approaches within each strand and how the strands relate to one another, painting a big picture of the diversity and complexity underpinning second language acquisition in a study abroad context. The chapters highlight themes such as social networks, input and interaction issues, learner identities and study abroad in lingua franca contexts, while also presenting other themes spanning the breadth of second language acquisition and interculturality research, such as individual differences and linguistic development. This comprehensive and cohesive volume showcases the latest innovative research using quantitative, qualitative and mixed method approaches across a range of source and target language learner cohorts, and highlights emerging themes and directions for future research.
Ultimate Attainment in Second Language Acquisition

A survey and analysis of second language theory discusses the development of ideas in this expanding area of language studies. It looks at the implications of these ideas and directions for future research. Contains study questions and activities as well as practical guidelines on the use of available research resources.

Understanding Expertise in Teaching

The Handbook of Second and Foreign Language Writing is an authoritative reference compendium of the theory and research on second and foreign language writing that can be of value to researchers, professionals, and graduate students. It is intended both as a retrospective critical reflection that can situate research on L2 writing in its historical context and provide a state of the art view of past achievements, and as a prospective critical analysis of what lies ahead in terms of theory, research, and applications. Accordingly, the Handbook aims to provide (i) foundational information on the emergence and subsequent evolution of the field, (ii) state-of-the-art surveys of available theoretical and research (basic and applied) insights, (iii) overviews of research methods in L2 writing research, (iv) critical reflections on future developments, and (iv) explorations of existing and emerging disciplinary interfaces with other fields of inquiry.

Spanish Second Language Acquisition
This book is intended to introduce novice student researchers to second language acquisition in the study abroad learning environment. It reviews the existing literature and provides the emerging researcher an overview of the important factors to consider, informs them where to begin, and how to move forth an agenda for future research in this field. The book recognizes that aside from the academic advantages, study abroad programmes are an excellent tool for fostering extended and relevant interaction with native speakers. It provides reflection questions and activities, and guides the novice researcher in critically analysing existing research and to eventually carry out their own study. The book will be of use to beginning researchers who are new to linguistics in the areas of study abroad and second language acquisition.

Questionnaires in Second Language Research

This book presents a view of human language as social interaction, illustrating its implications for language learning and second language teaching. The volume advocates for researchers, practitioners, and administrators to rethink and reconceptualize an understanding of language beyond that of the written word to one encompassing social and interactional activity built on co-construction, collaboration, and negotiation. The book emphasizes the ways in which this view of language can shed light on the language learning process as one which draws on discrete linguistic units and constructions in conjunction with a range of temporal, sequential, and embodied resources across a variety of social

Page 7/25
contexts. In turn, these insights prompt further reflection and discussion on their implications for advancing second language teaching practice.

This book will be key reading for scholars interested in second language teaching research, as well as active second language teachers and language program administrators.

The Study of Second Language Acquisition

This edited volume brings together large-scale research as well as case studies from a range of geographical contexts and represents a variety of educational settings involving second language learners and users. Its aim is to explore the interrelated issues of psychology and technology use in second language learning settings as well as in more autonomous environments. As language learning professionals continue to devote more time and attention to making various technological tools an integral part of the classroom, it is just as important to understand the influences that these tools have on the psychological state of the learners who use them. In consideration of this objective, the volume examines factors such as learner attitudes and motivation, emotion and behaviour, and the cognitive processes that are at play in the minds of the language users. This volume will be of interest not only to language teachers but also to researchers working in second language acquisition (SLA), applied linguistics, and educational psychology.

Technology and the Psychology of Second Language Learners and Users
This third edition of the best-selling Theories in Second Language Acquisition surveys the major theories currently used in second language acquisition (SLA) research, serving as an ideal introductory text for undergraduate and graduate students in SLA and language teaching. Designed to provide a consistent and coherent presentation for those seeking a basic understanding of the theories that underlie contemporary SLA research, each chapter focuses on a single theory. Chapters are written by leading scholars in the field and incorporate a basic foundational description of the theory, relevant data or research models used with this theory, common misunderstandings, and a sample study from the field to show the theory in practice. New to this edition is a chapter addressing the relationship between theories and L2 teaching, as well as refreshed coverage of all theories throughout the book. A key work in the study of second language acquisition, this volume will be useful to students of linguistics, language and language teaching, and to researchers as a guide to theoretical work outside their respective domains.

**Writing**

*Questionnaires in Second Language Research: Construction, Administration, and Processing* is the first guide in the second language field devoted to the question of how to produce and use questionnaires as reliable and valid research instruments. It offers a thorough overview of the theory of questionnaire design, administration, and processing, made accessible by concrete, real-life second language research applications. This Second Edition features a new chapter on how an actual scientific instrument was developed using the theoretical guidelines in the book, and new sections on translating questionnaires and collecting survey data on the Internet. Researchers and students in second language studies, applied linguistics, and TESOL programs will find this book invaluable, and it can also be used as a textbook for courses in quantitative research methodology and survey research in linguistics, psychology, and education departments.

**Second Language Learning Theories**

This text examines different perspectives on the role that interaction plays in second language acquisition. In addition the effects of language aptitude on input processing are considered, and the contribution that interaction makes to the acquisition of grammatical knowledge is discussed.

**Sociolinguistics and Second Language Acquisition**
This volume focuses on 'practice' from a theoretical perspective and includes implications for the classroom.

Key Terms in Second Language Acquisition

The first book-length treatment of its type, Ultimate Attainment in Second Language Acquisition is a case study with a solid theoretical grounding that examines the language of an immigrant learner of English, and thereby presents a much needed understanding of the linguistic competence of second language speakers. Based on longitudinal data collected over a period of 16 years, this clear and accessible presentation is well-grounded in linguistic theory and in second language acquisition research issues. Author Donna Lardiere presents the narrative of Patty, an adult Chinese immigrant learner of English, who achieves native-like proficiency in some areas of her English idiolect, although reaches a plateau in her language acquisition, known as the concept of fossilization. By addressing this concept, a central idea in second language acquisition research, Lardiere fills a void in existing literature. Individual chapters focus on Patty’s end state knowledge of grammatical areas of finiteness, past-tense marking, word order, wh-movement and relativization, passivization, number marking, and use of determiners. Important topics discussed throughout the book include: *learner variability in production; *case study methodology; *the roles of motivation and prior language (L1) knowledge; and *sensitivity to input in circumscribing ultimate attainment in
adult second language acquisition. Ultimate Attainment in Second Language Acquisition is intended for anyone whose research is in the areas of second language acquisition, language acquisition, theoretical, applied, or developmental linguistics. It is also appropriate for graduate level students of TESOL and teachers who work with more advanced learners of foreign languages.

**Practice in a Second Language**

This highly accessible introductory textbook carefully explores the main issues that have driven the field of second language acquisition research. Intended for students with little or no background in linguistics or psycholinguistics, it explains important linguistic concepts, and how and why they are relevant to second language acquisition. Topics are presented via a 'key questions' structure that enables the reader to understand how these questions have motivated research in the field, and the problems to which researchers are seeking solutions. It provides a complete package for any introductory course on second language acquisition.

**Racialized Identities in Second Language Learning**

**Introducing Second Language Acquisition**

Now in its second edition, Introduction to Instructed Second Language Acquisition continues to present a cohesive view of the different
Theoretical and pedagogical perspectives that comprise instructed second language acquisition (ISLA). Loewen provides comprehensive discussions of the theoretical, empirical, and pedagogical aspects of a range of key issues in ISLA, and has added to this edition a comprehensive exploration of the relationship between ISLA research and second language pedagogy. Also new is the addition of supporting features including end-of-chapter activities, points for reflection, and discussion questions, as well as thoroughly revised content to reflect the most recent research in ISLA. This is an essential resource for students new to ISLA, or working in Second Language Acquisition more generally.

Introducing Second Language Acquisition

The introduction and tracking of reference to people or individuals, known as referential movement, is a central feature of coherence, and accounts for “about every third word of discourse”. Located at the intersection of pragmatics and grammar, reference is now proving a rich and enduring source of insight into second language development. The challenge for second language (L2) learners involves navigating the selection and positioning of reference in the target language, continually shifting and balancing the referential means used to maintain coherence, while remaining acutely sensitive to the discourse and social context. The present volume focuses on how L2 learners meet that challenge, bringing together both eminent and up-and-coming researchers in the field of L2 acquisition. The chapters address a range of
problems in second language acquisition (SLA) (e.g., form-function mapping, first language [L1] influence, developmental trajectories), and do so in relation to various theoretical approaches to reference (e.g., Accessibility Theory, Givenness Hierarchy). The global outlook of these studies relates to the L2 acquisition of English, French, Japanese, Korean, and Spanish and covers a diverse range of situational contexts including heritage language learning, English as a medium of instruction, and the development of sociolinguistic competence.

The Acquisition of Spanish as a Second Language

While the focus is on the acquisition of Spanish as a second language, this is also an extremely useful volume for second language theoreticians and practitioners involved in all aspects of the pedagogy of other second languages. Students, teachers, program administrators, and scholars alike will benefit from the insights that the contributors bring to the myriad issues that language professionals confront."--BOOK JACKET.

Key Questions in Second Language Acquisition

The Second Language Learning Processes of Students with Specific Learning Difficulties is the only recent book available to offer a detailed and in-depth discussion of the second language learning processes of students with specific learning difficulties (SpLDs). It summarizes research advances in the fields of
cognitive and educational psychology and integrates them with recent studies in the area of second language acquisition (SLA). Thus the book is relevant not only to readers who are particularly interested in the role of specific learning difficulties in learning additional languages, but also to those who would like to understand how individual differences in cognitive functioning influence SLA. The book focuses on four important areas that are particularly relevant for language learners with SpLDs: the processes of SLA in general and the development of reading skills in particular, the effectiveness of pedagogical programs, the assessment of the language competence of students with SpLDs and identifying SpLDs in another language. The book also views learners with SpLDs in their social and educational contexts and elaborates how the barriers in these contexts can affect their language learning processes. This is an excellent resource for language teachers, students, and researchers in the areas of second language acquisition and applied linguistics.

Life as a Bilingual

Evidence-Based Second Language Pedagogy is a cutting-edge collection of empirical research conducted by top scholars focusing on instructed second language acquisition (ISLA) and offering a direct contribution to second language pedagogy by closing the gap between research and practice. Building on the conceptual, state-of-the-art chapters in The Routledge Handbook of Instructed Second Language Acquisition (2017), studies in this volume are organized according to the key
components of ISLA: types of instruction, learning processes, learning outcomes, and learner and teacher psychology. The volume responds to pedagogical needs in different L2 teaching and learning settings by including a variety of theoretical frameworks (sociological, psychological, sociocultural, and cognitive), methodologies (qualitative and quantitative), target languages (English, Spanish, and Mandarin), modes of instruction (face-to-face and computer-mediated), targets of instruction (speaking, writing, listening, motivation, and professional development), and instructional settings (second language, foreign language, and heritage language). A novel synthesis of research in the rapidly growing field of ISLA that also covers effective research-based teaching strategies, Evidence-Based Second Language Pedagogy is the ideal resource for researchers, practitioners, and graduate students in SLA, applied linguistics, and TESOL.

Introduction to Instructed Second Language Acquisition

"Second Language Acquisition in a Study Abroad Context" brings together for the first time a series of studies which explore the relationship between language learning and the study abroad experience. Utilizing different research methodologies (quantitative, qualitative, descriptive), the focus in this collection is on various aspects of second language learning, including the acquisition of sociolinguistic competence, the acquisition of fluency, the use of communicative strategies and the development
of oral and written skills. The studies are cross-linguistic and deal with student populations at the secondary and college levels who spent between three months and one year in study abroad or exchange programs in Japan, Russia, Spain, Mexico, France or Canada.

Multilingualism, Second Language Learning, and Gender

Whether we grow up with one, two, or several languages during our early years of life, many of us will learn a second, foreign, or heritage language in later years. The field of Second language acquisition (SLA, for short) investigates the human capacity to learn additional languages in late childhood, adolescence, or adulthood, after the first language --in the case of monolinguals-- or languages --in the case of bilinguals-- have already been acquired. Understanding Second Language Acquisition offers a wide-encompassing survey of this burgeoning field, its accumulated findings and proposed theories, its developed research paradigms, and its pending questions for the future. The book zooms in and out of universal, individual, and social forces, in each case evaluating the research findings that have been generated across diverse naturalistic and formal contexts for second language acquisition. It assumes no background in SLA and provides helpful chapter-by-chapter summaries and suggestions for further reading. Ideal as a textbook for students of applied linguistics, foreign language education, TESOL, and education, it is also recommended for students of
linguistics, developmental psycholinguistics, psychology, and cognitive science. Supporting resources for tutors are available free at www.routledge.com/ortega.

Second Language Learning

This volume presents a comprehensive introduction to the study of second language learning, multilingualism and gender. An impressive array of papers situated within a feminist poststructuralist framework demonstrates how this framework allows for a deeper understanding of second language learning, a number of language contact phenomena, intercultural communication, and critical language pedagogy. The volume has wide appeal to students and scholars in the fields of language and gender, sociolinguistics, SLA, anthropology, and language education.

Learning a Second Language Through Interaction

Sociolinguistics and Second Language Acquisition is a comprehensive textbook that bridges the gap between the fields of sociolinguistics and second language acquisition, exploring the variety of ways in which social context influences the acquisition of a second language. It reviews basic principles of sociolinguistics, provides a unified account of the multiple theoretical approaches to social factors in second languages, summarizes the growing body of empirical research, including examples of findings from a wide range of second languages, and discusses the application of sociolinguistics to the second
language classroom. Written for an audience that extends beyond specialists in the field, complete with summary tables, additional readings, discussion questions, and application activities throughout, this volume will serve as the ideal textbook for advanced undergraduate or graduate students of second language acquisition and instruction, and will also be of interest to researchers in the fields of second language acquisition, second language instruction and sociolinguistics.

Theories in Second Language Acquisition

A clear and practical introduction to second language acquisition, written for students encountering the topic for the first time.

The Handbook of Second Language Acquisition

The new edition of Key Terms in Second Language Acquisition defines the key terminology within second language acquisition, and also provides accessible summaries of the key issues within this complex area of study. The final section presents a list of key readings in second language acquisition that signposts the reader towards classic articles and also provides a springboard to further study. The whole book has been updated and expanded to take into account a wider range of theories and developments since the first edition. It remains at the top of its game. The text is accessibly written, with complicated terms and concepts explained in an easy to understand way. Key Terms in Second
Language Acquisition is an essential resource for students.

Study Abroad, Second Language Acquisition and Interculturality

*Winner of the 2019 AAAL First Book Award*

Racialized Identities in Second Language Learning: Speaking Blackness in Brazil provides a critical overview and original sociolinguistic analysis of the African American experience in second language learning. More broadly, this book introduces the idea of second language learning as "transformative socialization": how learners, instructors, and their communities shape new communicative selves as they collaboratively construct and negotiate race, ethnicity, gender, sexuality, and social class identities. Uju Anya’s study follows African American college students learning Portuguese in Afro-Brazilian communities, and their journeys in learning to do and speak blackness in Brazil. Video-recorded interactions, student journals, interviews, and writing assignments show how multiple intersecting identities are enacted and challenged in second language learning. Thematic, critical, and conversation analyses describe ways black Americans learn to speak their material, ideological, and symbolic selves in Portuguese and how linguistic action reproduces or resists power and inequity. The book addresses key questions on how learners can authentically and effectively participate in classrooms and target language communities to show that black students' racialized identities and investments in these communities greatly influence their success in
second language learning and how successful others perceive them to be.

The Second Language Learning Processes of Students with Specific Learning Difficulties

The present volume examines the relationship between second language practice and what is known about the process of second language acquisition, summarising the current state of second language acquisition theory, drawing general conclusions about its application to methods and materials and describing what characteristics effective materials should have. The author concludes that a solution to language teaching lies not so much in expensive equipment, exotic new methods, or sophisticated language analysis, but rather in the full utilisation of the most important resources - native speakers of the language - in real communication.

An Introduction to Second Language Acquisition Research

Divided into six parts that are devoted to a different aspect of the study of SLA, this title contains chapters on universal grammar, emergentism, variationism, information-processing, sociocultural, and cognitive-linguistic.

Second Language Acquisition

Second Language Learning Theories is a clear and concise overview of the field of second language
Second Language Acquisition

acquisition (SLA) theories. Written by a team of leading academics working in different SLA specialisms, this book provides expert analysis of the main theories from multiple perspectives to offer a broad and balanced introduction to the topic. The book covers all the main theoretical perspectives currently active in the SLA field and sets them in a broader perspective per chapter, e.g. linguistic, cognitive or sociolinguistic. Each chapter examines how various theories view language, the learner, and the acquisition process. Summaries of key studies and examples of data relating to a variety of languages illustrate the different theoretical perspectives. Each chapter concludes with an evaluative summary of the theories discussed.

This third edition has been thoroughly updated to reflect the very latest research in the field of SLA. Key features include: a fully re-worked chapter on cognitive models of language and language learning a new chapter on information processing, including the roles of different types of memory and knowledge in language learning the addition of a glossary of key linguistic terms to help the non-specialist a new timeline of second language learning theory development This third edition takes account of the significant developments that have taken place in the field in recent years. Highly active domains in which theoretical and methodological advances have been made are treated in more depth to ensure that this new edition of Second Language Learning Theories remains as fresh and relevant as ever.
Second Language Acquisition: introduces the key areas in the field, including multilingualism, the role of teaching, the mental processing of multiple languages, and patterns of growth and decline explores the key theories and debates and elucidates areas of controversy gathers together influential readings from key names in the discipline, including: Vivian Cook, William E. Dunn and James P. Lantolf, S.P. Corder, and Nina Spada and Patsy Lightbown.

Interaction, Language Use, and Second Language Teaching

Understanding how people learn and fail to learn second and foreign languages is increasingly recognised as a critical social and psycholinguistic issue. Second languages are vitally important to diverse groups of people, ranging from refugees to college students facing foreign language requirements. This book provides a synthesis of empirical findings on second and foreign language learning by children and adults, emphasising the design and execution of appropriate research.

Cases on Communication Technology for Second Language Acquisition and Cultural Learning

Now in a fourth edition, this bestselling introductory textbook remains the cornerstone volume for the study of second language acquisition (SLA). Its chapters have been fully updated, and reorganized where appropriate, to provide a comprehensive yet accessible overview
of the field and its related disciplines. To reflect current developments, new sections on using learner corpora, semantics and morphosyntax (within formal approaches to SLA), sociocultural approaches, gesture, priming research, and chaos theory have been added. Students will also find expanded discussions of heritage language learning, bilingualism, pragmatics, and much more. The redesigned fourth edition of Second Language Acquisition retains the features that students found useful in the current edition but also provides new pedagogical tools that encourage students to reflect upon the experiences of second language learners. As with previous editions, discussion questions and problems at the end of each chapter help students apply their knowledge, and a glossary defines and reinforces must-know terminology. This clearly-written, comprehensive, and current textbook, by expert Sue Gass, is the ideal textbook for the introductory SLA course in second language studies, applied linguistics, linguistics, TESOL, and language education programs.

Evidence-Based Second Language Pedagogy

Studies on Learning and Teaching Chinese as a Second Language represents the current advances in the field. It showcases theoretically motivated empirical studies and diverse methods used for a better understanding of how Chinese language is acquired as a second or foreign language. This contributes to L2 acquisition research in general and L2 Chinese specifically. Furthermore, this research is useful for teachers seeking to understand their students’ learning
processes and adjust their pedagogical approach for more effective instruction. The book bridges the gap between research and instruction by providing pedagogical implications rooted in empirical findings.

Understanding Second Language Acquisition

A book on those who know and use two or more languages: Who are they? How do they do it?

Copyright code: be8460d5ed2f715fd97f5eadc886e6bd
